

DEDICATED ASSISTIVE LITERACY DEVICE

Focused literacy support for classroom tasks.

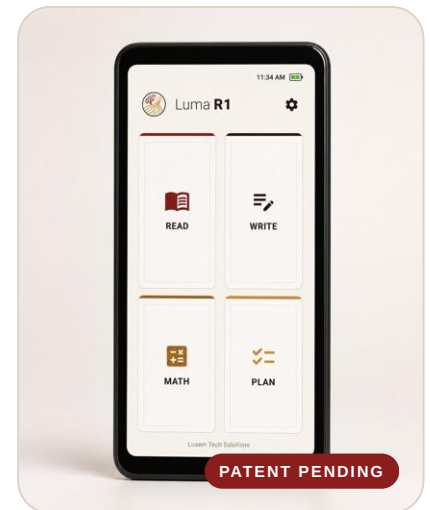

Luma R1 brings focused reading and writing support to a dedicated device, with selected math and planning tools for everyday school tasks.

READ

WRITE

MATH

PLAN

FOR SCHOOL TEAMS

Start with the classroom task, then review the available tools, controls, and practical limitations for your intended use.

WHAT THE DEVICE SUPPORTS

Read & listen

Capture printed text, review the recognized page, and listen by word or sentence.

Write & revise

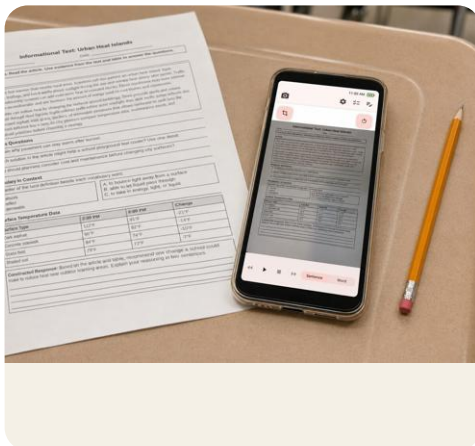

Type, dictate, use predictions, edit, and listen back in a focused writing workspace.

Math & plan

Choose from calculation and other math supports, task, timer, and scheduled-prompt tools.

Focused by design

No web browser, app store, games, or general entertainment apps.

A REAL CLASSROOM WORKFLOW

Support the work without replacing the pencil.

Luma R1 helps a student move through reading and composition while keeping the final paper response in view.

1

Read the assignment

Capture printed work, listen, and review.

2

Build a response

Use writing tools to develop and edit ideas.

3

Return to paper

Use the reviewed response as a guide.

Best fit: reading or composition occurs on Luma R1 and the final response returns to paper. Typing-first digital-submission workflows are not supported.

Offline-first core tools

Read, Write, Math, and Plan normally work without an active internet connection. Optional software updates require an active internet connection.

Flexible controls

No student account is required for ordinary use. Settings can remain student-accessible or be locked and hidden.

Start with a 15-minute conversation.

See the workflow, request a written quote, or ask whether Luma R1 fits your school or district.
