

## Health Equity in Dementia Risk, Prevalence and Research

Tremendous gains have been made in the understanding of the science and basic biology underlying Alzheimer's and other dementias. These advances are leading to great strides in strategies for prevention, detection, diagnostics, and therapeutic interventions. Despite all the progress we've made so far, disparities still exist in dementia. Dr. Griffin will provide a broad overview of the landscape of the disease, highlight early detection and diagnosis, and discuss healthcare disparities.

**Friday, June 18**

**9:30 - 11:00 am**

**Registration is required. Call: 800.272.3900**

**or register at: <http://ow.ly/Rnie50ESDgN>**

You will receive connection information after you register.

Percy Griffin, Ph.D.

Percy Griffin, Ph.D., is director, Scientific Engagement for the Alzheimer's Association®, where he leads efforts to accelerate the organization's scientific agenda through the creation and delivery of ongoing research education. He engages with more than 75 Association chapters across the country, informing staff and the public of scientific initiatives and the organization's crucial role in advancing research to improve the lives of all those facing Alzheimer's and other dementias.
